Women's Institute

The June meeting of the Champion Women's Institute on Tuesday afternoon was held in the United Church and was the occasion of the first official visit of District Director Mrs. J. A. Campbell of Milk River. There was a good attendance of members and about forty guests including those from the neighboring towns of Carmanagay and Kirkealdy. Following a short business session, with Mrs. R. I. Baker presiding, Mrs. Campbell addressed the meeting saying she was happy to come to Champion where she could combine a visit to the W. I. with one to her sister, Mrs. P. Dawson. "Good Citizenship" was the topic chosen, and Mrs. Campbell quoted the Archbishop of York as saying "The true purpose of education is to make good citizens." Training, she said, should begin at home in obedience and self control, and continue in the schools where tolerance, adaptability and good sportsmanship should be inculcated. Naturalization should not be by persuasion but should be voluntary and surrounded with dignity. Although it is inherent in everyone to love the country of their birth, this should not prevent them from becoming good citizens of the country of their adoption. A program presented by the local branch, included vocal solos by Mrs. McLennan, musical selections by Don Stephenson, Max Caldwell and Don Campbell, a reading by Mrs. Collins, a resume of Current Events by Mrs. Moffatt and a short Health Play entitled "Who said Six Year Mothers," directed by Mrs. Bastin, in which 16 children took part, Ada Williamson officiating at the piano. All these numbers were well received by an appreciative audience. Delightful refreshments were served by Mesdames Dawson, Bain and Ulrich, the church being beautifully decorated with house plants, carnations and roses.

Champion's Ball Team Trims them All

On Wednesday afternoon, June 15, a picnic was held at the lower dam on Lake McGregor with Archie Ruggles in charge. The day was ideal and there were games and sports for the children and adults, so that everyone had an enjoyable time.

Yetwood and Champion met in the first baseball, resulting in an 8-1 decision in favor of Champion. J. Stoves and H. Matlock in the points for Yetwood, while Walker and Watts were the Champion battery.

Lomond and Champion also furnished the crowd with good entertainment, the latter winning by the score of 5-3. Batteries: Lomond, Alldred; Champion, McLaren and Watts. The picnic was so successful that it promises to become an annual event. Lunch was provided by a booth on the grounds.

The rapidity with which French or stink weed is overrunning the country may well cause alarm. The roadside seemed to have more or less of a monopoly of this weed until recently, but now it has taken to the fields in earnest. The present season with cool days and slow growth for so long a period in the spring has been particularly favorable for weeds of all kinds.

Heard on the Street in Champion

"Hog market is good, isn't it? Last week I sold 37 fine hogs and got \$107.00 for the bunch, and you don't know how lucky I was. A neighbor of mine brought in two fine sows, weighing 1050 lbs, and got a check for \$7.05 for the two of them. I wish someone would tell us why these good heavy sows are only worth 65c per hundred lbs."

The writer listened to this conversation and decided to try and find this out. After interviewing several packing house representatives and various other people interested in the pork industry, he was able to explain this heavy cut on sows as follows.

It is due almost entirely to the prevalence of the Hessian Fly in Kansas, which so seriously affects the oyster market in Seattle. Of almost equal importance is the over production of vitamin "A" in central Africa. Of course, Russia is not to be held blameless, for over there silk stockings are \$12.00 a pair, and everyone knows you must make silk stockings out of a sow's ear.

This is the sum and substance of all the explanations given to us regarding these ridiculous prices for heavy hogs, and we were also led to believe that the same reasons apply to the low prices now paid for butter and eggs. We shall be glad to try and answer any other little marketing problems which may crop up in the future.—Writers name on request.

S. H. Bain Leaving Champion

Mr. S. H. Bain, proprietor of the Economy store has accepted a position in the east as manager of a wholesale Fruit Co., and will leave for that city in the near future. Mr. Bain came to Champion last September from Lethbridge where he was credit manager for the Nash Symington Fruit Co. Mr. and Mrs. Bain have been active in many circles during their short residence here and their departure is a regret to many associates. All will join in extending their very best wishes to Mr. and Mrs. Bain in their new home.

Political Meeting Well Attended

A very largely attended meeting was held in the Community Hall, Champion Thursday June 16th.

The meeting was addressed by Hon. O. L. McPherson, Minister of Public Works and a member for the Little Bow Constituency.

The speaker dealt with problems common to all governments at this time, and especially with those confronting the Government of Alberta, with special reference to the shrinkage of Provincial revenue and consequent increase in taxation. He also dealt quite lengthily with the matter of gas conservation in the Turner Valley field.

Mr. McPherson's address was thoughtful and informing, and was very well received by the people present.

"THIS Reckless AGE"

WITH
Charles Buddy Roberts
Charlie Ruggles
Peggy Shannon
Richard Bennett
Francis Dee

Youth must have its fling

See what happens when head-strong, vivacious youth clashes with heart-strong, loving parents.

It hits home—"This Reckless Age" and it hits back at the hypocrites who say "This Reckless Age" is all bluff, bluff, and slang!

They haven't forgotten how to blush! They know where harmless fun stops and danger begins, they only come a little closer to the brink, that's why they're called "This reckless Age."

THURSDAY June 16, 1932

NOTES AND COMMENT.

The second general crop report for 1932 is featured by greatly improved moisture condition over the same date in 1931. The grasshopper situation in Manitoba is serious, but energetic control measures have been taken. Further general rains are needed. In Saskatchewan, damage from soil drifting has been very widespread over all of southern central, and eastern parts of the province, but more especially in the south. A general soaking rain is badly needed over all the drifted areas. Cutworms are working in every district but are more active in the south and centre.

Conditions in Alberta are generally favorable as to moisture, absence of drifting and cutworm damage. The general height of wheat in the three provinces ranged from two to six inches. Seeding of coarse grains is about completed in Manitoba and Saskatchewan. Growth in Alberta is delayed to some extent by rains and cold weather. The whole province now needs warm sunny weather to promote more rapid growth. Compared with the report issued by the Free Press, June 6th, 1931, which was considered the most disappointing ever issued at that date in 29 years, the present report is a decided improvement.

Standing in front of the Law Courts in Vancouver is one of the highest flagpoles in the British Empire. It flies its flag 210 feet to the air. A few days ago it became necessary to supply a new rope, but officials were faced with the problem of getting the rope through the pulley at the top of the pole. After scouting around for some time, a young sailor from the new Canadian National Steamship, Prince Rupert, which operates on the Alaskan run from Vancouver in the summer, volunteered and was awarded the task. He had not made much progress before he began to attract attention and by the time he was half way up the pole thousands were crowded around the Law Courts building watching the human fly gradually work his way towards the top. His work was made more difficult because of a stiff wind blowing and when he reached the top he was forced to tie himself around the pole for safety. His return to the ground was just as dangerous as the trip up because of the wind but the plucky young sailor-man was given a thundering cheer by the thousands of watching spectators.

Clipping the clouds along the snow-capped ridges of the Athabasca Valley, a puss-moth buzzed a noisy and important celebration of the opening, June 1, of fishing for the first time in the major lakes of Jasper National Park. Mountain barnstorming threatens to develop into a new mode of sight-seeing in this mountain resort, and the old timers with their packs and saddles gaze aloft in disgust. Instead of hitting the trail to fish the leaping, lunging dynamite, all the indolent need do now is troll from their aeroplane. That is their verdict anyway. An ex-ail-miles pilot, who planned down near town two weeks ago and has done a thriving business over the green wanted peaks ever since. With fishing developing into a big attraction, he now plans on bringing in an amphibian machine and having his passengers in and out with their legal limit of fish in the space of a morning. Aeroplanes or no aeroplanes, the outitters aren't worrying. They are taking comfort in daily to the waters that have nurtured fish for three years now before the public opening. Maybe there are still enough old-fashioned people to keep them busy.

With eggs selling there at 40 cents apiece, the old saying in Russia seems to have been changed to "scarcce as hen's eggs."

Many motorists seem to expect filling station signs of the near future to read "Tax 25c, Gasoline 10c."

Standard Time And Time Zones Established Throughout Canada From Atlantic To Pacific Coast

The faster means of transportation and communication made possible in recent years by the aeroplane, the motor car, the radio, and wireless telegraphy, together with the greater interest thus developed in affairs in distant places, have made necessary a much more developed knowledge of corresponding times and related matters. Many questions relating to standard time are referred to the Dominion Observatory of the Department of the Interior. In order to meet this popular demand for time information the Department has had prepared and printed a small pamphlet entitled "Standard Time and Time Zones in Canada."

Everyone knows the meaning of the expression "standard time" but few in the present generation are aware that the adoption of standard time zones was due to the efforts of that eminent Canadian, Sir Sanford Fleming. From 1878 he had been advocating the use, throughout the world, of standard time zones. In 1884, at a conference held at Washington in 1884, his suggestions were adopted and it was agreed to urge all countries to use standard time zones.

Since Canada extends east and west almost one-quarter of a complete circuit of the globe, the time at the Atlantic may be still midnight at the Pacific, there are six different standard times. Six o'clock a.m. in Halifax is five a.m. in Ottawa, four a.m. in Winnipeg, three a.m. in Calgary, two a.m. in Vancouver, and one a.m. in Dawson, while any locality is using daylight saving time it is simply adopting the standard time of the zone to the east of it.

With the exception of Quebec, Ontario, and the Northwest Territories, each province has adopted a single standard time. Atlantic standard time, which is the local time at the 60th meridian (running near Sydney, Cape Breton), is four hours less than Greenwich and is used throughout Nova Scotia, Prince Edward Island, New Brunswick, and those parts of Quebec and the Northwest Territories east of the 68th meridian. Eastern standard time, which is the local time at the 75th meridian (running near Cornwall, Ontario), is five hours less than Greenwich and is used in Quebec west of the 68th meridian, in Ontario east of the 90th meridian, and in the Northwest Territories west of the 105th meridian. Central standard time, which is the local time at the 90th meridian, is six hours less than Greenwich and is used in Ontario west of the 90th meridian, in Manitoba, in the Northwest Territories between the 105th and 120th meridians, and in the southern part of Saskatchewan. Mountain standard time, which is the local time at the 105th meridian (running near Regina, Saskatchewan), is seven hours less than Greenwich and is used throughout Saskatchewan, excepting the southeastern part, throughout Alberta, and in that part of the Territories between the 105th and 120th meridians. Pacific standard time, which is the local time at the 120th meridian (running near Kamloops, British Columbia), is eight hours less than Greenwich and is used in British Columbia and in that part of the Northwest Territories lying west of the 120th meridian. Yukon standard time, which is the time at the 135th meridian (running near Whitehorse, Yukon Territory), is nine hours less than Greenwich and is used throughout Yukon Territory.

Non-dancer (tugred to lend the orchestra a hand): "But I know about about music!"
"All you have to do is to jangle that bell."
"But suppose I come in at the wrong place?"
"You can't—in jazz."

A delegation of Jewish and Arab orange growers will leave Palestine shortly to attend the Ottawa Imperial Conference.

Enforce Safety Measures

Motion Picture Theatres In Canada Rank High In Respect To Fire Control

Motion picture theatres in Canada now rank the highest of any class of property in respect to fire control, according to the report of J. Drew Smith, Dominion Fire Commissioner, submitted to the annual conference of Canadian fire marshals which opened in Ottawa.

During the past year, the loss from fire in Canadian theatres has been less than \$4,000, and constitutes a record for any country in the world. Mr. Smith stated. The \$20 million picture theatres in the Dominion, the report shows, handle \$46,000,000 of highly inflammable film annually. The excellent showing is attributed to the efficient inspection by provincial authorities; co-operation of local operators; and to Col. John A. Cooper, president of the Motion Picture Exhibitors Association, who is an enthusiastic advocate of theatre safety requirements.

In full uniform, the Prince of Wales, Colonel-in-Chief of the British South Africa Corps, has been seen in London to Gordon Camp, 18 miles from Aldershot, and bade farewell to the 1st Battalion before it left for Palestine recently.

Now that the Japanese have slowed down, people are more interested in seeing them get ahead.

When Books Were Bricks

Writing Done On Clay In Old Babylonian Days

Nearly every city, town and village in Canada has its public library, which gives great joy to many people, but it is strange to note that in the days before paper was made, there were public libraries in every town in Babylon. In one there were 20,000 volumes arranged on shelves, but each book was a brick, for writing then was done by indenting letters on clay and baking the clay in an oven. The thought of this is that it is likely that ancient Babylon had more books than our country had a few generations ago.

In those days it was a great honor to be a librarian, and sometimes this honor was sought by the king's son himself, who was proud to be in charge of these precious brick stories and histories.

On one brick discovered in our time is the beginning of a story about a small wall who was rescued by the king from "dogs and ravens" and was handed over to a priest. The priest branded his feet with his seal, and the wall was then given to a nurse, the king promising to provide food and clothing for him for three years. The story ends abruptly, for the brick was broken!

Children went to school then as now, though the blackboard was a large baked clay tablet on which maxims and other things had been traced in straight wedged-shaped letters.

Birds Menace To 'Planes

Collisions Which Prove Highly Dangerous Have Been Reported

Now that aeroplanes have become the fastest of man's conveyances, birds have become a menace. Two recent "freak" accidents have been reported as the result of collisions in the air with hawks, crows, buzzards or kites. One of these was caused at an altitude of only thirty feet when a kite struck the plane, turning off a propeller blade and tearing off the plane over in a field. Another, even more thrilling, encounter was reported by a British army officer in India. He was flying at about fifteen hundred feet, when a sudden vibration through the plane decided him to make a rapid but careful landing. The landing edge of one of the lower planes had been crushed by a hawk and mechanics found a kite-hawk that had fallen near by with every bone broken.

Could Not Be Shorter

The editor of a paper received a long poem from a gentleman, and wrote to the lank-haired specimen a mild remonstrance.

"You must really send shorter verses," was the wind up of the editor's exordium.

The reply was:

"I enclose you a little thing, that is short and to the point."

"The Ballad of the Tradesman."

"Trust, Bust."

More than 55,000,000 stems of bananas were imported into the United States during 1931.

Cook Islands, in the South Pacific, have issued new pictorial stamps.

A Miss That Never Misses

Those who consider that the vaunted performance of William Tell was something to write home about should see Wah-Natche, Red-Rock, full-blooded Algonquian Indian, from Hudson Bay. The 26-year-old Indian maid is shown as she demonstrated her skill with bow and arrow, using a human target, at New York. The victor snatched archery experts with her unerring accuracy with the ancient weapon.

Victoria Observatory Reports

Discovery Of New Star Many Times Larger Than The Sun

Empire Ship Service

Need For Contact Between Canada and Other Parts Of Empire

In view of the possibilities of trade and various parts of the British Empire cannot be minimized, said the report of the transportation committee of the Canadian Manufacturers' Association presented at the annual general meeting at Ottawa. "The Association has already expressed itself on several occasions in favor of the granting of subsidies for encouragement of direct steamship services where necessary," the committee said. It was noted, however, that the amount of aid to steamship companies operating in several trade routes between Canada and various countries has been curtailed during the last few years and further curtailment was in prospect for the fiscal year ending March 31, 1932.

The difficulties under which Canadian railways had been operating during the past year were reviewed. It was pointed out that while most of these adverse influences were common to all railways on this continent, the Canadian situation was particularly acute on account of the extensive railway mileage in this country as compared with the relatively small population served.

Dominion legislation during the recent session generally had not been of such character as to make necessary an action by the association. Government regulation of motor vehicles continued to be a subject of serious study, said the report, and it was likely some plan with respect to co-ordinating the various types of transportation would soon be established.

Every Farmer Should Have Account Book

To Keep Record Of Yearly Receipts and Expenses

Farming is a business, and if it doesn't pay the farmer wants to know why it doesn't pay. Some record of receipts and expenses together with an inventory (a list with values of livestock, feed, implements, etc., on hand), taken at the beginning and end of the farmer's year, must be kept if he is to find out why or where it doesn't pay. A record of each department of the farm business should be kept. This is the only way to find out how much is being made from each of which departments are not paying. To assist the farmer in this matter the Dominion experimental farms have issued a very simple and useful little account book. This little book, while simple, is a great step in advance of keeping no accounts whatever. It may be procured from the Publications Branch, Department of Agriculture, Ottawa, for the sum of ten cents.

Still Going Strong

Although she is 40 years old, the king's yacht, "Britannia," will be in the Cowes waters again this year. In her young career she has won over 200 first prizes, a record which no other vessel of her class has ever approached.

"Pugilism" comes from the Latin "pugnare" meaning fighting with clenched fists.

Sugar cane is a native of India.

Farming is a business, and if it doesn't pay the farmer wants to know why it doesn't pay. Some record of receipts and expenses together with an inventory (a list with values of livestock, feed, implements, etc., on hand), taken at the beginning and end of the farmer's year, must be kept if he is to find out why or where it doesn't pay. A record of each department of the farm business should be kept. This is the only way to find out how much is being made from each of which departments are not paying. To assist the farmer in this matter the Dominion experimental farms have issued a very simple and useful little account book. This little book, while simple, is a great step in advance of keeping no accounts whatever. It may be procured from the Publications Branch, Department of Agriculture, Ottawa, for the sum of ten cents.

Still Going Strong

Although she is 40 years old, the king's yacht, "Britannia," will be in the Cowes waters again this year. In her young career she has won over 200 first prizes, a record which no other vessel of her class has ever approached.

"Pugilism" comes from the Latin "pugnare" meaning fighting with clenched fists.

Sugar cane is a native of India.

A Real Bird Lover

Roller Coaster, Manager Lost Money Rather Than Disturb Birds

The roller coaster at "Kiddieland" in the Cincinnati zoo is running again, and a family of robins have found a new home. The roller coaster was to have opened the season, but Director Bill Eberhardt found two robins and their four youngsters ensconced in a spring home on the coaster rails. Though it meant turning away scores of children eager for rides, "Kiddieland" remained closed to await the pleasure of Mr. and Mrs. Robin and family.

New Serum Valuable If Proved Successful

Being Tested For Prevention and Treatment Of Whooping Cough

The discovery of a serum which is expected to help materially in the prevention and treatment of whooping cough in infants was described to the Health Officers' Association at their convention in Toronto by Dr. D. T. Fraser of the Connaught Laboratories and the School of Hygiene of the University of Toronto. Although Dr. Fraser stressed that the serum may or may not prove valuable, it has been found successful at the Hospital for Sick Children and in hospitals in Manitoba. It has been used by the medical profession for the past six months. Dr. Fraser said, "and is being tried out in about 150 cases."

Physicians said that statistics show that as many deaths occur from whooping cough as from diphtheria, and twice as many in England. The disease is considered fatal to infants under a year old.

Nearly all buildings being erected in Buenos Aires, Argentina, are apartment houses.

The University of Michigan has the most complete library on good roads in existence.

Temperature of the Gulf Stream ranges from about 62 in winter to 68 in summer.

"I got two mads at the registry office today and engaged both."

"Yes, one comes on the first and the other on the fifteenth."—Hummer, Hamburg.

The 40th Anniversary of

"SALADA" TEA

For 40 years SALADA has given the finest quality in tea. Present prices are the lowest in 15 years.

Nationalism, Good And Bad

If nationalism is destroyed, mankind will be reduced to a helplessly dead level, declared Dr. A. N. Whitehead, of Harvard, representing the British Academy at the Royal Society of Canada meeting in Ottawa. Dr. H. M. Tory, president of the National Research Council of Canada, and former president of the University of Alberta, supplemented this declaration by saying: "No nation has qualified to take the international arena until it has firmly established itself on national grounds. Canada has men of capacity to do this. It is up to us to provide them with the opportunity."

They are quite right, comments the Border Cities Star. If they are speaking of nationalism in the sense of a strong but sensible national pride which impels scientists and engineers to achieve greater things than their colleagues in other countries, so that mankind as a whole may benefit, and glory redound to the nation which originates the discoveries or the measure of progress. And it is to such a type of nationalism that one may readily believe men like Dr. Whitehead and Dr. Tory refer.

But there is another sort of nationalism. It is ruining nations; it is stifling mankind. It has brought about the present depression. It is causing unemployment, ruin and suffering. It is a war-stirred old world inevitably toward a grimmer conflict than any in history; a conflict which, unless it is avoided, may witness the destruction of civilization as we know it.

It is to that kind of nationalism which is based in a false conception of racial superiority, where one people look down upon other peoples, where racial color lines are drawn, where differences in language and religion are emphasized to the supposed advantage of one group of people over other groups. Nationalism founded in false pride, pretensions, based upon purely selfish considerations and an utter disregard of all other peoples and nations, nationalism which would seek glory and aggrandizement for itself at the expense of all others, does not qualify any nation for a place in the international arena. It does not lift a nation above other nations, does not raise a nation to a higher level, but reduces all to a lower level and takes the glory that should be its life out of it.

When, following the Great War, the League of Nations was brought into being, it had for its object the uplifting of all nations, the development of an act of brotherhood of mankind. In keeping with that aspiration the Peace Treaty made provision for the self-determination of races and nations. It provided for a larger liberty for oppressed minorities, ideal of peace as a whole. But, unfortunately, these newly created smaller nations, as well as many of the older nations, became imbued with the idea that they must first and foremost establish and develop a strong national spirit and consciousness, and this found expression in that narrow form of nationalism to which reference has been made.

This narrow nationalism fostered suspicions of other nations, was built and thrived upon fear and enmity. It impelled nations, not to remove existing barriers to international intercourse, but to erect new and even more formidable barriers. It resulted in a mad race of still greater armaments, the spending of untold billions in preparation for future wars. It led governments the world over to spend and spend madly without due regard to the national income or even of the economic and financial capacities of all nations combined.

This narrow nationalism developed at the outset at such a rate and to such an extent that it largely smothered the League of Nations ideal of true internationalism founded upon a sane nationalism which only desired such glory and power for itself as grew out of the fact that it was making a larger and finer contribution to mankind at large than other nations were making.

Until this narrow nationalistic spirit is destroyed there can be no permanent peace, progress and prosperity in the world. In its destruction lies the only hope for mankind.

Chivalry On The Road

Something More Than "Reasonable Care" Required From Drivers

Legislation works no charm on the roads or elsewhere. It can only create the conditions in which safety can thrive. Ultimately we must protect ourselves. But when that is said, we can only return to an appeal frequently made in this column. As drivers of machines of lethal possibilities, motorists should not be content in the crowded conditions of today with what is called "reasonable care." Pedestrians are not all so young as they were. The Highway Code has not cured the short-sighted or the hard of hearing. It has not given good legs to the lame. There is a child at every crossing. Nothing short of chivalry is demanded, and from our modern chauffeurs it is not too much to ask.—Daily Herald, Glasgow.

Park Buffalo Not Friendly

The buffalo in Buffalo National Park at Watrous, Alberta, are not disposed to be sociable and visitors are warned against any efforts towards making friends with them. At the Parks Branch of the Department of the Interior, which administers the park, keeps a number of animals in a special paddock for exhibition purposes.

All Her Children Were Troubled With Diarrhoea

Mr. J. J. Dickert, R.R. 1, Enderby, B.C., writes:—
"Last Summer all my children were troubled with diarrhoea, and so were I. I did not know what to do. At last I went to see Dr. F. W. Taylor's Extract of Wild Strawberry. I got a bottle, and after a couple of doses you should have seen the change. The children were soon well again, and I am very thankful to your wonderful remedy. I find it the only one that relieves so easily and quickly."

Sound Proofs His Home

Dance Band Conductor Can Now Practice Without Any Complaints

Jack Hyton, the London dance band conductor, has been driven from flats to hotels and from hotels to houses for five years, trying to find somewhere to practice.

Everywhere people protested, and so now he has built a sound-proof room in the heart of Mayfair.

Mr. Hyton turned a number of garages into a house and made an underground music room. The room has no windows, and the walls are so thick that no sound can be heard outside.

Above the band practice room Mr. and Mrs. Hyton have their living quarters. There are 10 rooms, in each of which is a gramophone and a wireless loud speaker.

Mr. Hyton said that the scheme had been designed by his wife. It is difficult to try out new compositions in an ordinary house, but as our correspondent has been yards away there can be no complaints.

Pay Friendly Visit

British Cruisers To Make Call At U.S. Ports
State department authorities at Washington today announced that at Newport that four British cruisers were expected to visit United States waters this summer.

The communication said the "Danae" was expected to stop at Bar Harbor, Me., from July 29 to August 10; the "Dragon" at Bar Harbor from July 28 to August 10; the "Scarborough" at New Bedford, Mass., from July 6 to 12, and the "Hector" at Gloucester, Mass., from July 20 to 27.

Trade Was Almost Even

Thirty-Five Seed Pans Given For Thirty-Five Eggs

Here's a picture on the trade-line of hen's eggs.
A Saskatchewan farm woman living about 10 miles from Regina is reported to have taken three dozen fresh eggs to a store and asked for their value in garden seeds.

"I had some garden peas," she said. The trade was made. The package of seeds was taken home. She counted them. For 36 eggs she had received 36 seed peas.

Records Chosen By Phone

Entertaining British Merchant Has New Service For Customers

Customers of a British dealer in phonograph records now choose their purchases by telephone. The enterprising merchant fitted a talking machine with an electric pick-up and amplifier, and plays over the selections before a telephone fitted with a hornlike transmitter. The telephone subscriber then places his order for the desired records.

Didn't Seem To Work

Mistress: "Heaven, Hodges! Have you been fighting?"
Slave: "No, lady. When his morning returned at 3 a.m. this morning, he said, 'Hodges, I can't sleep, and so your ladyship, I am upon me the importance of humoring him on such occasions. I replied, 'My lord; shall I get the tea-pot?' Hence these few lines."

New Emergency Station

The new emergency or "iron" station to be issued to the troops is just a hard cake weighing only 6 ozs. It consists of cocoa, sugar, pea powder, puff powder, oil of lemon and cocoa butter. It is supposed to sustain a man for twenty-four hours.

Northern Wireless Station

There is a Dominion Government wireless station at the east end of Great Bear Lake in the Northwest Territories of Canada. Its location is shown on the recently issued map sheet published by the Topographical Survey, Department of the Interior, Ottawa.

Barber's Rich and Kingworms are recommended by the use of Douglas's Egyptian Liniment; quick, certain relief. Relieves the most obstinate cases.

"The poets perform a great mission in this world."

"If it wasn't for them the magazine editors would have an awful time filling in small spaces at the bottom of pages."

"Yes," said the millionaire, "I not only made hay while the sun shone, but I made it from the grass that grew under other people's feet."

Erosion of soil costs Iowa a loss of about \$3,000,000 a year in agricultural production.

W. N. U. 1948

A Grand Old Scot

Late "Steady" McIntosh Of Aberdeenshire Was Great Athlete

The late Alexander McIntosh, of Craib, Aberdeenshire, may not be written into the annals of Scotland, but he was a grand old Scot just the same.

"Steady" McIntosh has just died at the age of 81. For sixty-five years he was an annual competitor in the field of sports at the Breamar gathering, near Banchory Castle. A member of the glasses, he was a man of superb physique, standing over six feet in height. Grey-headed and possessed of a massive frame, the veteran Highlander headed the Parquharson clan in the annual parades bearing the standard, and his appearance in the arena invariably aroused the admiration of the gatherings round the ring.

The Breamar gathering was the event of the year for "Steady," availing as it did memories of the "sixties of last century when first he took his place among the sportsmen in the ring. At 21 he was beginning to make a name for himself as a heavy-weight athlete, winning several of the principal awards at Breamar.

At 72, fifty-one years later, he took third place in the caber tossing competition, although the opportunity in time included some of the best-known heavyweights in Scotland.

A caber is a shapen piece of a tree about twenty feet long and weighing enough to be a strenuous lift off the ground for the average man. The user has to hold it up to his waist and his hands take a short run and then heave the pole so that it will turn over on its own length in the air before it falls. "Steady" McIntosh was the best at what was sport at the age of 72.

Most of the young men of today would be baffled to lift the thing off the ground at all.

Bird's-Eye Maple In Demand

Used Extensively On Account Of Strength and Furring Qualities

All kinds of furniture are manufactured from Canada's sugar maple, from solid wood veneers to plywood. The veneer of bird's-eye maple is particularly in demand, according to the forest service, Department of the Interior. The strength and wearing qualities of the wood assure it a place in the vehicle industry, where it is used for heavy axles, frames, sleigh runners, factory trucks, bicycle wheel rims, etc. Because of its toughness it is made into baseball bats, hockey sticks, billiard cues, paddles, croquet balls, mallets, etc. The sugar maple is a leading wood for flooring, and its strength and stiffness suits it for the great variety of tool handles that are made from it.

Seeking Lumber Outlet

Delegation From British Columbia May Go To Orient

Possibility of sending British Columbia lumber trade delegation to the Orient with the object of enlarging the sale of lower grades of lumber to China and Japan, has been suggested by the timbermen of the province. It was announced by Hon. N. S. Paughman, Minister of Lands and Forests, that the recent United States against Canadian lumber will close a market for the low grade product that absorbed \$17,000,000 from British Columbia last year.

Great Britain and other empire sources are counted on to increase their imports of higher grade lumber from British Columbia.

Its Quality Sells It.—The fact that so many thousands of intelligent people continue to use Dr. Thomas' Electric Oil speaks volumes for its healing efficiency. Ever since it was first introduced it has grown steadily in public favor, owing entirely to its quick and reliable results in the healing sciences. As a specific for cuts, burns, scalds, and various legions of the skin, it is beyond reproach.

Phases For Herdsmen

The tests of the nomadic Lapps who take their reindeer herds to graze in Sweden will in future be fitted with telephones. The Lapps may then phone each other regarding grazing conditions and the state of the herds generally.

COLIC

"Really, I think BABY'S OWN TABLETS is the best remedy for colic. I saw a box of Dr. F. W. Taylor's Extract of Wild Strawberry. I got a bottle, and after a couple of doses you should have seen the change. The children were soon well again, and I am very thankful to your wonderful remedy. I find it the only one that relieves so easily and quickly."

Erosion of soil costs Iowa a loss of about \$3,000,000 a year in agricultural production.

British Scientists Go North

Will Endeavor To Probe The Mystery Of The Northern Lights

Equipped to send up sounding balloons to an altitude of 10 miles to test weather conditions and also to probe the mystery of northern lights, members of the British Royal Expedition are on their way to their base at Fort Rae, on Great Slave Lake. The band of scientists is headed by Dr. J. M. Stagg, of the British Meteorological office.

Plans provide for the party remaining at Fort Rae until September, 1933, for the purpose of studying weather conditions in the far north. The work is part of an international arrangement which is also being participated in by Canada, United States, Denmark, Russia and a number of other countries.

To carry on its investigations in the north, the British party brought with it instruments from the Old Country. It also has brought here 10 tons of foodstuffs donated by British and Canadian manufacturers.

Canadian Film

First Canadian Drama-Talkie Is Produced In Toronto

First Canadian drama-talkie, "The Bella," has been produced in Toronto by George Thorne Booth, with Dickson-Korwin, Canadian actor, in the title role. The two-reel film was based on a script used long ago by Sir Henry Irving.

The production of this all-Canadian product makes many difficulties had to be overcome. It was made in the main gallery of the Fine Arts Building and the cast were all Torontoites. Lack of sound-proof equipment made remote orchestral control very difficult and even single bells had to be faked with an ash tray and a tumbler because real bells refused to register as bells at all.

The movie-tune has been shown privately.

Has Long Extension

London Firemen Communicate By Phone On Rescue Ladder

So tall is a rescue ladder recently put into service by firemen of London, England, that a telephone is used to maintain communication between those at the top and bottom. Fully extended, it is 104 feet, and is said to reach twenty feet higher than the ladders now in use. The men at the base may follow the progress of the rescue work by phone.

The use of Miller's Worm Powders to relieve children so far as the ailments attributable to worms are concerned. A high mortality among children is traceable to worms. They sap the strength of infants so that even in the adult they are liable to life and succumb to weakness. This preparation gives promise of health and keeps.

Should Pay Small Bills

It may sound odd to say that the reason that collections are slow is because collections are slow. It is a sober fact, however. If the people who own small accounts, from fifty cents to five dollars, let us say, would pay them—and most people are able to do that—much the payment of the large amounts would be greatly facilitated thereby. As the late E. H. Hubbard wrote, "The unfortunate man is the dispenser to evade the payment of small bills."

The every soul campaign funds is this: Every one knows they expect, but hardly any one knows when they come or whether they go.

Sun Spots and Rain

Plenty Of Moisture For Western Grain Fields Is Predicted

Western Canada may expect fairly generous rains for some time to come if sun-spot data collected by the Dominion Observatory runs true to form. According to observatory officials, Canada is now approaching a "sun-spot period," which should produce plenty of moisture for the western grain fields.

The effect of sun-spots, it was explained, is to increase the rainfall over a long period.

A sun-spot period lasts for 11 to 11½ years. This does not mean that increased quantities of rain will fall for a short period, but rather that over a long period the precipitation will be higher than when the sun-spots are not in evidence.

Heavy rains in different parts of the world at present were hardly attributed to sun-spots.

To begin with, in the absence of accurate world data, scientists were unwilling to agree that the rainfall over the world has been exceptionally heavy.

While precipitation has been great in certain countries, it was not so in others.

Certain parts of Canada, for instance, had been exceptionally dry during May, while others had experienced generous rains.

Officials made it clear that a few weeks' heavy rain cannot be explained by sun-spots. Their effect is over a much longer period.

Women and Asthma. Women are numbered among the sufferers from asthma by the countless thousands. Every year they will be found helpless in the grip of this relentless disease which they have had themselves of the proper remedy. Dr. J. D. Kellogg's Asthma Remedy has brought new hope and life to many such. Testimonials, sent entirely without obligation, show the enormous benefit it has wrought among women everywhere.

Realizes His Ambition

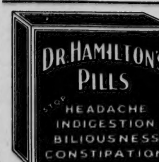

Swiss Watchmaker Has Brought To Perfection An Electric Watch

A retired watchmaker of Geneva, Switzerland, has just fulfilled his twenty-year ambition to perfect an electric watch. Driven by a fly-powder motor, it needs no connection with outside wires. The case itself contains a storage battery no larger than the winding mechanism of most timepieces, which is declared to hold its charge for a year, and which may be recharged when necessary. Electricity actually operates the watch and does not merely wind a spring, as is the case in self-winding clocks.

She—If I'd known you would be such a brute to poor Fido I'd never have married you.

He—The anticipated pleasure of kicking that miserable little beast was one of my chief reasons for proposing.

Paper has been manufactured in one region of Rumania since 1559 and in another since 1583.

It struck Jean as curious that Nick had been able, more or less, to keep himself in hand whilst Sir Adrian inflicted upon Claire whatever of mental and spiritual torture seemed good in his distorted vision. It was the fact that he had hurt her physically, laid his hand upon her in actual violence, which had scattered Nick's self-control to the four winds of heaven. To Jean herself, it seemed conceivable that the mental anguish which Claire's married life had probably far outstripped any mere bodily pain. Half tentatively she gave expression to her thoughts.

"God God!" he exclaimed. "If you were a man, you'd understand! I see now when I think of that day, of your striking the woman I love. It—it was sacrilege—if you take her away with you, Nick?" asked Jean very quietly. He flushed purple.

"He'll divorce her, and then we shall marry," he answered. "Even so—steadily—it would be doing all that good may come."

"It's a long way to it—long way," he suggested, evading a direct answer. "Refuse! You know her better than that. If you wanted Claire to make a burnt-offering of herself for your benefit tomorrow, you know she'd do it! And—and—laughing a little hysterically—"pretend, too, that she enjoyed the process of being grilled!"

Now, Nick, it's up to you—to go on to help me make her life bearable, as you have done for the last two years.

"It's asking too much of me, Jean," Nick spoke a little bitterly. He was up against one of man's most primitive instincts—the instinct to protect and comfort and cherish the woman he loved.

"I know. It's asking everything of you," Jean yielded. She felt that she had gained a certain amount of ground—that Nick's resolution had weakened a little in response to her pleading.

She feared to drive him too far. She fancied she could hear toes creaking the hall below. If someone should come upstairs and disturb her, while things were still trembling in the balance—

"See, Nick," she began to speak again hurriedly. "You believe I'm your pal—and Claire's?"

"I know it," he replied quickly. "And—and you do care a bit about me?"—smiling a little.

"You're the third woman in my world, Jean. After Claire and my mother."

Times Have Changed

World Goes Far In Sanitation During Last Twenty Years

A catalogue issued by a school for the mobility of Saint Cyr, France, 20 years ago, was discovered recently. It shows how far we have come in the matter of personal cleanliness and sanitation since that time. Pupils at this school were entitled to one suit of underwear, one pair of stockings and one pair of shoes. One of the towels had to last a week without laundering. One foot bath monthly and three complete baths yearly, one each in May, June and July, were prescribed.

Such a Waste Things and money were very scarce at the offices of Messrs. Solomon & Cohen. For three whole days the partners had been pouring over books and feverishly adding up figures. At the end of it all, a wall of despair escaped the tips of Mr. Solomon.

"Ach, Cohen," he cried, "vot a waste, vot a waste! We have given the bookkeeper a week's holiday, and his books was right after all!"

Not According to Grammar The class were determined not to make any mistakes. All went well until the inspector questioned Jimmie.

"Now, my lad," he said, "what's the plural of mouse?"

"Mice," replied Jimmie.

"Right," said the inspector. "And now tell me what's the plural of 'baby'?"

"Twins," answered Jimmie.

With a total population smaller than that of the largest cities of the world, Australia produces goods worth \$2,500,000,000 a year.

Sluggish Liver And Rheumatism Both Corrected By Famous Vegetable

"I received immediate relief from my rheumatism and indigestion," writes Arthur P. "I recommend them to sufferers from Rheumatism and Indigestion."

Because they are **PURELY VEGETABLE**, a gentle, effective tonic to both liver and bowels. Dr. Carter's Liver Pills are available to all for curing Constipation, Acidity, Bilelessness, Headaches and Poor Complexion. 25c. 47c. red package. Sold everywhere.

French Aviator Will Attempt Daring Stunt

To Demonstrate New Machine Will Crash With Occupants Unhurt

M. Savant, a French aviator, proposes to crash to earth in a blazing aeroplane from a height of 3,000 feet. He declares that he and his mechanic will escape unhurt. For four years, M. Savant, who was in the French Air Force, has been working on the invention of a machine with a unique casting. When crashing, the outside casing will smash, he says, but the inner one, in which are the occupants, will remain intact. Last year he experimented with a miniature machine in which he had placed a lamb, and the animal was none the worse, and he also placed a chicken's egg inside an ostrich's egg, which he dropped from a height of 375 feet, and the chicken's egg remained unbroken.

"My system is adaptable to land or sea machines," he says, "I shall rise, with my machine, to a height of 3,000 feet, and then, falling, setting fire to the machine as we come down. When we have crashed and the fire is out my machine and I will emerge unhurt from the inner casing."

Back to the old story.

Give me the fields of clover And the thrush's happy call; I don't mind a row, I have wearied of far things' thrall.

I would renounce the fever, All the hurry and fret of the game; I don't mind a row, I have wearied of far things' thrall.

I would go back to the byways, To the little lane I love; Let me find the simple pleasure, Where the great crowd moves.

Give me the fields of clover And the thrush's happy call; I don't mind a row, I have wearied of far things' thrall.

I would go back to the byways, To the little lane I love; Let me find the simple pleasure, Where the great crowd moves.

Give me the fields of clover And the thrush's happy call; I don't mind a row, I have wearied of far things' thrall.

I would go back to the byways, To the little lane I love; Let me find the simple pleasure, Where the great crowd moves.

Give me the fields of clover And the thrush's happy call; I don't mind a row, I have wearied of far things' thrall.

I would go back to the byways, To the little lane I love; Let me find the simple pleasure, Where the great crowd moves.

Eno Cleanliness Means Good Health

Water alone will not remove grime from your hands... you need soap, too. It's the same with inward cleaning... it takes more than a mere laxative to remove poisonous matter. That's why ENO'S "Fruit Salt" is so good for you. It helps to make and keep you healthy by thoroughly cleansing the intestinal tract. Take it daily, morning or night. But be sure it's ENO'S.

She's Up in the Air Again

Those she loves... are fired to suffer when monthly pains threaten her. Lydia E. Pinkham's Vegetable Compound would ease that agony.

"I haven't been so happy for years"

"I've just thrown out all my dust cloths"

"because I've found how to do the work better, easier and quicker."

you use Applender Wonder Paper now. You buy it in a neat package that looks away hands in a table drawer. Twenty-five large sheets for a quarter. When you use it, you simply crumple a sheet into a soft wad and go over whatever needs attention.

"I've never seen anything like Wonder Paper. It really dries, cleans and polishes at the same time. It takes up like magic, and so easily. And you can use both sides."

"What I used to loathe about dusting was the bother of keeping the dustpan clean. I always used odds and ends of old rags and the like—and it seemed to me as though I was never getting it. I worried me just to throw them into a bag or cupboard. They seemed so unsanitary."

"The beauty of Wonder Paper is that it gives you time for doing it very much more attractive than dusting."

Special Offer

WONDER PAPER is made by the makers of the famous FARA-SANI Heavy Waxed Paper in the Green Box. Most grocery, hardware and department stores have packages of it.

For stock, if you have them, send a booklet entitled "Letters" containing one hundred recipes, as a bonus for you trouble.

Applied Paper Products, Ltd., Hamilton, Ontario.

Send me kind 25c for which please send me one package of The Wonder Paper and your 100 recipes for "Letters."

SCIENCE COMES TO AID OF THE WESTERN FARMER

Ottawa, Ont.—For the purpose of considering and advising upon the solution of urgent problems of agriculture in all the major divisions of Canada—the Maritimes, Quebec and Ontario, the Prairies and British Columbia—the newly-formed national advisory committee on agriculture of the National Research Council met here.

Dr. H. M. Tury, president of the council, stressed the need of co-operation and co-ordination in working out national problems. Accomplishments of Canadian research organizations working in co-operation during recent years were outlined before the committee.

Dr. Robert Newton, acting director of the division of biology and agriculture, recounted the enormous progress made in the last decade through research organizations working in co-operation.

The prospect of having rust-resistant wheat in the prairie provinces, free from other diseases and of high milling and baking quality, within 10 years of the organization of the committee which brought all agencies together on a common programme, he described as a scientific accomplishment of the first magnitude.

He stated that rust-resistant varieties of wheat from all the agencies which developed them have been pooled for final test. These selected are being tried out at numerous points, and the resulting grain is to be studied by laboratories at the Dominion Department of Agriculture and the three provincial universities.

The grain research committee since its inception has undertaken several major special investigations. Dr. Newton said there was now in press the final report on the investigation of the drying of grain "which should clear up all points likely to arise." Before the end of the year, the committee expects to publish a report of frost injury to grain, the result of which included artificial frosting of grain at the University of Alberta and a study of the consequences in the laboratories of the three prairie universities.

Numerous complaints regarding the effect of the combine method of harvesting on grain have resulted in the organization of an elaborate investigation. Some years ago the committee began an investigation of the quality of the numerous varieties of wheat grown in the west. The information obtained was of great value to the committee in making its recommendations on the grading of "Garnet" wheat. "There is no available," Dr. Newton said, "an authoritative classification of the leading varieties and there is no adequate information of inferior varieties need further be grown."

"If we cannot carry things beyond the range of other people there is no justification for our existence," Dr. Newton declared in outlining the projected program of the committee. Studies in agriculture to be undertaken in the new laboratories are to be fundamental in character and of such a nature that they cannot be undertaken elsewhere in Canada.

Referring to Canada's most important agricultural product, wheat, and in particular to the suggestion that carotin (one of its constituents which gives a yellow color to flour if not bleached out) may be added with the vitamin value of the flour, Dr. Newton said: "If there is anything to be found out, either for or against our grain, Canada should find out about it first."

The advisory committee adjourned to meet again in November at the time of the royal winter fair in Toronto.

To Discuss Wheat Bonus

Regina, Sask.—Discussion of asking for an extension of the five-cent per bushel bonus on wheat for export, paid by the Federal Government this year, will come up at the inter-provincial conference of the western provinces in Regina on June 20. The primary purpose of the conference will be to draft a memorandum setting forth the west's interest in the coming Imperial Conference.

Health Plan Rejected

Saskatoon, Sask.—Intended for submission to the convention of the Saskatchewan Union of Urban Municipalities, a resolution suggested by Dr. Arthur Wilson, health officer, proposing immunization against communicable disease of all persons applying for relief was turned down by the city council by an unanimous vote.

W. N. U. 1946

No United Ireland

North Would Never Be a Party To Separation From Britain

London, England.—Reports in London that present negotiations between the Free State and Britain, would be widened, on the Free State side, by attempts to re-open the question of union between the Free State and Northern Ireland, met with a prompt rebuttal from Viscount Craigavon, Premier of Northern Ireland.

Lord Craigavon said union was quite out of the question. "A long time ago," he declared, "we in Ulster made up our minds that we have no change to make. I would never be a party to separation from Great Britain or severance of the Imperial connection."

The present British Government and I see eye to eye," Opinion here is that President de Valera proposes, if he has not indeed already done so, reference of the whole dispute to either an Imperial or international tribunal. His bill for abolition of the oath, which the British Government as the root of the present difference, is dedicated in the Irish senate, shorn of most of its teeth by an opposition majority.

Memorial To Queen Alexandra Unveiled

King George Officially At Ceremony Outside Marlborough House

London, England.—In the presence of the Queen, the Prince of Wales and most other members of the royal family, the King unveiled the memorial to Queen Alexandra, erected by the British Empire League, at Marlborough House, where Alexandra as Princess of Wales spent her married life prior to the accession of Edward VII, and where she returned after his death.

The ceremony coincided with the annual Alexandra rose day instituted under the late queen's auspices 21 years ago. She died in 1925.

New Governing System

Something Is Needed To Take The Place Of Early Politics

Winnipeg, Man.—Government partisanship breaks down in the face of economic difficulties and some new system must be devised. J. W. Dufour, editor-in-chief of the Winnipeg Free Press, told delegates to the third Dominion conference on social work here.

A new conception of the state in relation to the individual was taking possession of the mind of the people, Mr. Dufour said. It was not generally appreciated how revolutionary this conception was, nor were its ultimate consequences known.

Death Of Joynson-Hicks

First Lord Brentford Dies At Age Of 80 Years

London, Eng.—Sir William Joynson-Hicks, first Lord Brentford, died at the age of 80 years. Congestion of the lungs complicated by heart weakness, which developed from a severe chill he sustained during a visit to the West Indies, in February, brought on the fatal illness. Lord Brentford was also one of the leading laymen in the Church of England and took a prominent part in the parliamentary battle over the revised book of common prayer.

Gold Receipts Heavy

Value Of Shipments To Mint In May Over Five Million

Ottawa, Ont.—Gold receipts at the Royal Canadian Mint during May were in excess of \$5,000,000 for the third time in history, the Dominion Bureau of Statistics reports. The gold content of the shipments received at Ottawa was 242,428 fine ounces, the value of this quantity at \$20.67 per ounce, the fixed price of gold, being \$5,011,428.

Relief Taker Well Fixed

Toronto, Ont.—While J. J. McQuade and his wife were obtaining food and coal from relief officials here, McQuade had a bank account of \$2,000, a mortgage on a local house and was able to purchase a farm at Malto, it was alleged by police who arrested the McQuades on their farm. They face charges of obtaining food by false pretences.

Northern Air Mail

Price of mail.—With 50,000 letters aboard the new regular monthly air mail service between here and northern Saskatchewan points was inaugurated recently. The planes were required to carry mail from Emma Lake, the air base here, to Lac La Ronge, and Montreal Lake, points of the air line. It was prepared by stamp collectors.

New Stamp Issue

Postage Stamps To Commemorate Imperial Conference

Ottawa, Ont.—Commemorative postage stamps will be issued in connection with the Imperial Conference, Announcement to this effect was made from the office of Prime Minister R. B. Bennett.

The statement reads: "Authority has been given for the issue of three commemorative postage stamps in connection with the Imperial Conference to be held in Ottawa next month."

"These stamps will be in the denominations of three, five and 15 cents."

"The three-cent stamp will bear a portrait of the King; the five-cent stamp of the Prince of Wales; and the 15-cent will be a double-sized pictorial stamp."

"The stamps are now in course of preparation, and will be issued on a date to be set after manufacture has been completed."

There will also be an issue of over-printed air stamps for the current year, these stamps being the current five-cent issue of air mail, with over-printed six cents, together with other printed stamps relating to the Imperial Conference.

"The denominations in which these stamps will be issued will ensure their use on mail matter going to all parts of the Empire, as well as to many other countries."

Favor Empire Trade

B.C. Industries Would Give United States Support To Talks

Victoria, B.C.—Co-operation of Empire trade for the benefit of British countries, and development of an Empire currency as a medium through which this trade could be carried on, would have the united support of British Columbia industries if considered at the Imperial Economic Conference opening next month in Ottawa, according to information received by the British Columbia Government.

SEE PLOT TO WRECK OTTAWA CONFERENCE

London, England.—The Daily Express says there is a "world plot against the Ottawa conference."

The newspaper, chief organ of Lord Beaverbrook, Canadian-born peer and Empire free-trade crusader, declared evidence was accumulating on all sides that there was a definite world plot to wreck the conference, to which all nations of the British Commonwealth look to help solve their joint economic problems.

Foreign nations, the Express said, are using every means of direct and indirect propaganda to sow seeds of discord between the Mother Country and the Dominions.

The Express quoted an article in a Canadian magazine by Lieut.-Col. J. B. McLean, about alleged attempts to create discord between Canada and Great Britain. It said while the Dominions were being told Great Britain will go to the conference ready to give nothing and ask everything, an attempt is being made to create a breach between the Dominions themselves on the suggestion each ought to profit at the expense of the other.

IT ISN'T WISE TO ARGUE WITH A CRICKET BALL.

Lieutenant Wair All member of the All India Cricket Team, at present touring the British Isles, is shown being asked off the field after he got hit on the head by a rising ball in the match at Lord's Cricket Ground, London, England. The injured player was taken to a nursing home, where he stayed for four days.

WOMAN DELEGATE RETURNS

Miss Winifred Kydd, Canada's woman delegate to the Imperial Conference at Geneva, has returned to Canada with the self-imposed task of informing the women of the Dominion of the results of the Conference and its prospects toward a final conclusion.

Quebec Forest Fires

Fears Expressed That Prospectors May Be Trapped In Burning Bush

Amos, Que.—Far in Quebec's hinterland forest fires are blazing across a wide area. Fears that some prospectors may be trapped in a country where there is little water to offer them safety are prevalent.

Four buildings fell in flames as the fire spread into the little settlement of Amos. And fugitives from the district are telling a tragic story. The fire started several days ago near the Dome and Hollinger mines after settlers had been burning slash. Fanned by a 40-mile wind, the blaze had assumed huge proportions in a few minutes. It spread over miles of brush.

Scorched heads and burned shirts were displayed as the settlers rushed down water-courses and dropped into creeks to avoid the flames. The Abasaka Lake and Bell River provided sanctuary for them after a hurried escape through slash and muskeg. Miles inland, far from safety, many prospectors were working. There are few lakes here. Whether they managed to outdistance the flames is problematical. No search can be conducted until the fire moderates.

James Bay Railway

Official Opening To Take Place On July 15th

Toronto, Ont.—Official opening of the railway line from Couchiching to Mooseonee on James Bay, will take place July 15, it was definitely announced, following a conference between Premier George H. Henry and George W. Lee, chairman of the Temiskaming and Northern Ontario Railway. Premier Henry is to drive the first spike on the line amid an elaborate ceremony.

Premier R. B. Bennett and Chief Justice F. R. Leitch, who drove the first spike in the Temiskaming and Northern Ontario line in 1902, are to be invited to attend.

Ruling Favors Indians

Alberta Game Act Allows Them Certain Privileges

Calgary, Alberta.—Indians have an unrestricted right to hunt for food on unoccupied lands regardless of the Alberta Game Act, the Alberta Court of Appeals ruled.

Mr. Justice McGillivray, who handed down the court's decision, said this ruling in no way implied that the provincial game act was ultra vires, but merely that it did not apply to Indians hunting for food on unoccupied grounds or other lands.

May Attend Conference

Victoria, B.C.—While no official statement has been made, it is probable that Premier S. F. Tolmie will attend the conference of the four western provinces at Regina June 20, as the representative of British Columbia. The government has already accepted the invitation of Premier J. T. M. Alexander of Saskatchewan to attend the meeting, which is to discuss the viewpoint of the west on Empire trade.

Saved From Hanging

Kamloops, B.C.—Saved from hanging when the British Columbia court of appeal granted him a new trial on appeal following his conviction of murdering two companions in the Premier Lake district in northern British Columbia in June, 1930, Karl Fredericks, 32-year-old trapper and prospector, was acquitted by an assize court jury here at his third trial.

Major E. G. Rogers, J. W. Ackland, H. B. Lyall, W. G. Fraser, W. J. Bulman, J. D. Ross, D. Ross, J. Berry, The Hon. Man, George Leach, Regina; Howard Jones, Saskatoon; T. George Wood, Raymond, Alberta; C. G. Graham, Edmonton; H. Hutchings, Calgary; W. G. Armstrong, Medicine Hat, Alberta; R. Bell-Ing, R. Thompson, J. H. Rolph, T. S. Dickson, H. MacLaren, G. E. Hermann, J. A. McFarlane, Vancouver; J. H. McDonald, New Westminster.

Chairmen of standing committees include: Tariff, J. O. Thorn, Toronto; transportation, W. S. Campbell, Toronto; commercial intelligence, W. S. Campbell, Hamilton, and greasing, A. Ross Robertson, Toronto.

Should Avoid THE DUPLICATION OF TAXATION

Ottawa, Ont.—Recommending that the Dominion, provinces and municipalities should get together in order to reach an understanding regarding fields of taxation, and thus avoid duplication, the Canadian Manufacturers' Association passed resolutions dealing with taxation and also unemployment.

The resolution dealing with taxation called upon the association to co-operate by asking members and employees, as well as the public throughout Canada, to refrain from making any expenditure except those immediately necessary.

It urged members to assist their provincial and municipal governments in curtailing expenditures, thereby lessening the burden of taxpayers. This would release large sums for use in agriculture and other basic industries.

The resolution was moved by F. C. Brown, Vancouver. Mr. Brown also moved a resolution on unemployment, urging co-operation in reducing unemployment. It called for action and support of controlled direct relief for those who cannot get work.

The election of officers at the concluding session of the association resulted as follows: President, W. C. Coulter, Toronto; first vice-president, Henderson, Montreal, and J. L. Anthes, Toronto, second vice-president, T. F. Monypenny, Toronto, and treasurer.

The executive committee includes: Major E. G. Rogers, J. W. Ackland, H. B. Lyall, W. G. Fraser, W. J. Bulman, J. D. Ross, D. Ross, J. Berry, The Hon. Man, George Leach, Regina; Howard Jones, Saskatoon; T. George Wood, Raymond, Alberta; C. G. Graham, Edmonton; H. Hutchings, Calgary; W. G. Armstrong, Medicine Hat, Alberta; R. Bell-Ing, R. Thompson, J. H. Rolph, T. S. Dickson, H. MacLaren, G. E. Hermann, J. A. McFarlane, Vancouver; J. H. McDonald, New Westminster.

Chairmen of standing committees include: Tariff, J. O. Thorn, Toronto; transportation, W. S. Campbell, Toronto; commercial intelligence, W. S. Campbell, Hamilton, and greasing, A. Ross Robertson, Toronto.

MORE ASSISTANCE IS REQUIRED FOR BEAUHARNOIS

Montreal, Que.—If the Beauharnois power undertaking is to be carried to a successful conclusion and contracts for power delivery met within stipulated periods, further substantial amounts of money must be raised. The vice-president, Arthur F. White, told the second annual general meeting of shareholders of Beauharnois Power Corporation here.

The condition of the financial market has made new financing extremely difficult, and since the exhaustion of the initial bond issue proceeds, the corporation has relied on bank loans, the securing of which has been facilitated by the Dominion Government.

Mr. White said. These loans, he stated, total about \$16,000,000. For the balance of 1932 approximately \$6,500,000 will be required, and requirements for the period 1933-37 will total about \$9,500,000—a grand total of \$32,000,000.

Members of the board, continued Mr. White, recognize that any plan of reorganization is dependent on further governmental assistance, and the government has intimated that it desires the collateral trust bondholders to take the necessary steps to force it can act to facilitate additional financing.

Empire Trade

We Import More Than Three Times As Much From Foreign Countries As We Export To Britain

Ottawa, Ont.—Canada in the month of April imported more than three times the merchandise from foreign countries than it purchased from British Empire countries, according to a report issued recently by the Dominion Bureau of Statistics. The imports from foreign countries were valued at \$23,340,562, and from British countries \$6,033,734.

Canada's trade in April, less than twice the goods to foreign countries that she did to British Empire countries. The exports to foreign countries totalled \$12,531,429, and to British countries, \$9,441,330.

Italy Bans Foreign Wheat

More Rigid Restrictions Are To Be Placed On Imports

Rome, Italy.—Rigid restrictions on the use of foreign wheat in Italy will become effective again next month when millers will be required to use 85 per cent. of domestic wheat in the making of their flour, the government announced Thursday, June 9.

July 7 was fixed by decree as the date for enforcement of the order in southern Italy and the province of Lazio. It will become effective in northern and central Italy on July 15.

Similar restrictions, imposed last year, were lightened gradually in the last few months.

Centenary Of Great Reform Bill Celebrated

Viscount Halifax Who Attended Personally Knew The Reformer

Newcastle, England.—Celebrations opened here June 7, to commemorate the centenary of the great reform bill, attended by Viscount Halifax and his son, Lord Irwin, former viceroy of India. Viscount Halifax, now 93 years of age, is probably the only living person who personally knew the reformer, the second Earl Grey. Prime Minister MacDonald secured passage of the bill, and whose family is still actively associated with this area.

Brutal Murder

Lothian, Que.—Arouned over the most brutal murder here in years, the officers of Lothian are adding provincial police in seeking two men who caused the death of Simon Bernard, well known and popular notary. He had been the best of friends with the reformed officers of the intruders to branch his La Banque Provinciale.

Will Attend Congress

Montreal, Que.—Some 1,800 devout Roman Catholics, led by three archbishops and several bishops of the church in Canada, sailed from Montreal last week-end, en route to attend the 12th International Eucharistic Congress in Dublin.

Crows Cheer Aviators

Milan, Italy.—Here Anselma D'Arbat Punari arrived here by train from Paris on her way to Rome, accompanied by her husband and greting at the station by cheering crowds.

New telephone directories will be issued in July.

Mr. and Mrs. C. N. Nelson were week end visitors at Stavelay.

Mr. and Mrs. R. Long of Calgary and Mr. and Mrs. John McLeod of Hannah motored to Banff Tuesday to spend a holiday at that resort.

Fishing parties to Lake McGregor are quite numerous from this vicinity and results are quite favorable, many nice pike being caught.

Mrs. A. W. Jopling and Mrs. H. N. Heal were visitors at the home of Mrs. C. Messinger at Carmangay recently.

W. R. McRae moved his farm buildings this week to a site one half mile north and west of the old location. W. H. Miller and Sons of Carmangay were in charge of the moving while G. A. Cress of Calgary was the carpenter in charge.

The following normal students are home, having completed their term on June 10: Misses Rheta Campbell, Edna Orr, Marlon Gardiner, Helen Holm and Ruby Alder.

Sam Jopling, accompanied by G. A. Cimolino of Calgary, salesman for Investors Syndicate, was in town for a few days last week. Sam reports business quite active in this line.

G. M. Blackstock, K. C., of Medicine Hat, was elected grand master of the Masonic Lodge of Alberta at the twenty-eighth annual convention of the order at Calgary last week. The newly-elected grand master succeeds Rev. Dr. George W. Kerby, of Calgary.

Musical examinations under supervision of the Lethbridge Conservatory of music have been in progress during the week, several from Champion going to Lethbridge to play before the examiners. Miss Heinicke paid her last visit here on Wednesday June 8th, until after the holidays.

Service will be held at Yetwood school Thursday evening June 16. Rev. Peter Dawson officiating.

The Ladies Aid will meet at the home of Mrs. A. B. Caldwell on Thursday, June 23, instead of the regular date June 30.

Will members and friends of the Ladies Aid please note the change in the date of the regular meeting from June 30th to June 23rd.

The bonus paid on wheat by the Dominion Government has been extended from June 15 to June 30. After that date, in no case will the bonus be paid unless the wheat represents carload lots that were billed out on or before June 30.

Mushrooms are becoming a staple article of diet this spring. They are growing hereabouts in the greatest profusion and to an unusual size. It has been learned that these dainties can be canned successfully, retaining their delightful flavor.

At practically all the recent school board meetings throughout southern Alberta contracts have been terminated and new ones drawn up with a change in salary schedule. Considerable reductions have been made in all instances.

J. L. Bowman has Wheat Foot High

A splendid sample of wheat, standing well over a foot in height, was received at the Alberta Wheat Pool office Thursday from J. L. Bowman, of Carmangay. The sample was taken from a 400 acre field, which had been seeded prior to the snowstorm during the latter part of April. The wheat has stood in a remarkable manner, giving promise of an excellent yield. Mr. Bowman has 1,000 acres seeded to wheat.—Calgary Herald

Now a thought—you reap an action; now an action—you reap a habit; now a habit you reap a destiny.

Local and General

Come to Champion July 1st

Preparations for a big day here on July 1st are well under way and the public may rely upon one of the best efforts at entertainment ever made here. The host of music, baseball, softball, athletic sports and other attractions will be supplied, finishing as usual with a big dance in the evening. In addition there will be a horse-show tournament. Special attention is being paid to booths on the grounds, which will supply all necessary adjuncts to a care free day. Make an effort to get to town early, as this will be an all day programme.

Announcement!
